

RAIN BARREL WORKSHOPS

Dauphin County Conservation District in partnership with Swatara Township and Derry Township Municipal Authority is hosting two rain barrel workshops. Rain barrels collect roof runoff and store the water for future use providing many environmental benefits. Rain barrels are inexpensive to install and maintain. Note: water collected in a rain barrel contains some pollutants and is unfit for human consumption.

The workshops will be held at the Swatara Township Municipal Building, located at 599 Eisenhower Boulevard, Harrisburg, PA on *Saturday, June 11, 2016 from 10:00 – 11:00 am* and at the Derry Township Municipal Authority [DTMA], located at 670 Clearwater Road, Hershey, PA on *Saturday, June 25, 2016 from 10:00-11:00 am*.

The workshops are open to all who are interested in installing a rain barrel. **There is no cost to attend the workshops.** Workshop participants will receive a **FREE RAIN BARREL** (*Limit one rain barrel per household*). If you have any questions about the workshops, call Gil Hirschel at 717-921-8100 or e-mail ghirschel@dauphinc.org.

Please register for the Swatara Township workshop by May 27, 2016 or the Derry Township Municipal Authority [DTMA] workshop by June 10, 2016. You can register by submitting the form below by mail to the District office or by calling or e-mailing Gil Hirschel at 717-921-8100 or ghirschel@dauphinc.org.

Financial and other support for these workshops is provided by a Greening the Lower Susquehanna NFWF grant administered by PSU Agriculture and Environment Center.
